

LIBRARY RE-OPENS

Saturday 19 July, 10.00 am - 1.00 pm

We are pleased to announce that the Library in The Stithians Centre will reopen on Saturday 19 July. Our thanks to Marian Hindle for making this possible.

We have introduced recommended Covid protection measures to keep you and others safe, but we need you to play your part, including wearing a face mask. **Please read the guidelines below before visiting the Library.**

If all runs smoothly then Marian will continue to open the Library weekly on Saturdays, with extended hours from 10.00 am until 1.00 pm.

If you wish to just return your books and not select new ones, you will be able to leave them at a drop-off table in the lobby, but only during Library opening hours.

No Fines will be charged until 22 August. This will give plenty of time for everyone to return their books.

What we need YOU to do to keep yourself and others safe

Masks must be worn at all times.

Hand sanitiser will be available in the lobby. Please use this on entering the building.

Only one person may enter the library at any time unless supervising a child or attending as a carer.

If there is a queue to enter the library, please ensure you abide by social distancing.

Please respect social distancing when interacting with Marian.

Gloves must be worn in the Library when handling books.

Take all litter home with you, including tissues, wipes and used gloves.

Do not enter any other rooms in The Centre, except toilets if absolutely necessary.

And, of course, please stay at home if you are displaying any Covid symptoms.

What we are doing to keep you safe

The Stithians Centre has been deep cleaned by a professional cleaning company.

Hand sanitiser will be provided.

Marian will wear a face mask and gloves.

Disposable gloves will be available in the Library.

Returned books will be quarantined for 7 days before being returned to the shelves.

Surfaces will be wiped down regularly.

We will keep a temporary record of who attends for 21 days and provide that data to NHS Test and Trace if needed. It is not compulsory for you to provide information but could help contain outbreaks.

THANK YOU FOR YOUR COOPERATION
